

Phase 2 of the Campaign to Replace NAFTA

No Vote Unless the NAFTA 2.0 Deal Signed Last Year Is Fixed to Cut Big Pharma Monopolies that Would Lock In High Drug Prices High and to Stop NAFTA's Job Outsourcing

The White House wants a vote on the revised NAFTA signed last year. But that NAFTA 2.0 deal **would not stop job outsourcing or raise wages - but it would lock in high medicine prices.**

Unions and consumer groups demand that these problems are fixed before any deal is sent to Congress.

NAFTA 2.0 has some improvements we've long demanded. But it also includes unacceptable new giveaways for pharmaceutical firms that would lock in U.S. policies that keep drug prices too high. And its labor and environmental standards must be strengthened and made subject to swift and certain enforcement.

If we can cut the Pharma giveaways and strengthened the labor and environmental terms and their enforcement while preserving the gains we've made, the final deal could stop some of NAFTA's serious, continuing damage across North America.

And that is worth fighting for, even as we must continue our campaign to achieve a truly transformational replacement of the corporate-rigged trade model.

What is the Replace NAFTA Campaign?

The North American Free Trade Agreement (NAFTA) is a 1994 deal between the United States, Canada and Mexico. At its heart are special rights and privileges for corporations that help them outsource jobs and attack domestic environmental and consumer protections. NAFTA has resulted in the loss of more than one million U.S. jobs, the displacement of millions of Mexican small farmers and downward pressure on wages in both nations. Multinational corporations have extracted hundreds of millions in taxpayer funds after attacking our laws before NAFTA Investor-State Dispute Settlement tribunals.

The ReplaceNAFTA campaign works with people like you to end NAFTA's ongoing damage throughout North America. We are for a new deal that benefits workers, consumers, and the environment.

The Replace NAFTA Campaign is Fighting to Fix NAFTA 2.0 by:

- **Cutting New Monopolies for Big Pharma that Lock in High Medicine Prices:** The NAFTA 2.0 text signed last year includes dangerous new monopoly protections for pharmaceutical firms that empower them to keep medicine prices high by avoiding generic competition *These terms would lock in high U.S. medicine prices and export those policies to Mexico and Canada - denying people access to lifesaving medicines.*
- **Strengthening Labor and Environment Standards and Enforcement to Stop NAFTA's Job Outsourcing and Downward Pressure on Wages:** While a potentially transformational new provision could empower Mexican workers to organize real unions, overall NAFTA 2.0's Labor and Environmental Chapters require improvement. *Labor and environmental terms must be strengthened and subject to swift and certain enforcement or NAFTA 2.0 will cause more outsourcing of pollution and jobs.*
- **Shutting Down More NAFTA Attacks on the Environment:** NAFTA 2.0 makes enormous progress in eliminating Investor-State Dispute Settlement (ISDS), a longstanding progressive demand. But some U.S. oil and gas companies with certain types of contracts with the Mexican government can still use ISDS. *These terms must be amended so Big Oil cannot attack Mexican environmental & health laws.*

Get Involved – Together, We Can Stop NAFTA's Damage!

The way forward on trade is neither NAFTA's damaging neoliberalism nor Trump's hateful nationalism. Today, more than ever, we must fight for a new trade model that increases wages and democracy and reduces outsourcing and corporate power. **Visit replacenafta.org to join the campaign.**
